UNIVERSAL FILTER FOR SPAS, JACUZZIS AND WHIRLPOOLS

FIBALON®compact pro deluxe is THE universal filter solution "Made in Germany" for your whirlpool, Jacuzzi or spa. The selected spherical shape, the special packaging size and the specially developed protective grid made of V4A stainless steel, enable a universal use with unique filter performance in the proven FIBALON® way. The curvature of the grid ensures a full faced flow through the filter media bed and guarantees best cleaning results.

THE UNIQUE, HYGIENIC AND MODERN WAY OF FILTRATION

The FIBALON®compact pro deluxe also has the worldwide unique dynamic fiber fixation "DyFix®", which guarantees an incomparable filtration performance and a high dirt absorption capacity. This results in less service and cleaning effort. FIBALON®filter materials are always made of recycled materials to protect the environment.

FIBALON®compact pro deluxe has an antibacterial effect for the fibers and guarantees a long service life. Moreover, it is easy to clean to reuse the innovative FIBALON®compact pro deluxe.

FIBALON®compact pro deluxe has a selectivity of 8 micrometers without clogging the filter unit. You can therefore always heat your spa. The water in your whirlpool will be optimally disinfected without limitations in water circulation.
