

# Replacing **FIBALON<sup>®</sup>compact** Simply & Easy as always

- 1 Disconnect the pump from the power supply
- 2 Open the filter-housing according to manufacturer's instructions
- 3 Please remove the existing cartridge
- 4 Put the **FIBALON<sup>®</sup>compact** with the seal ends to the left and right side in the filter-housing

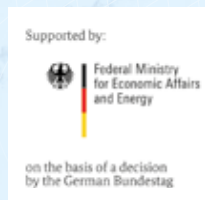

- 5 Close the filter-housing according to manufacturer's instructions
- 6 Restore the power supply

For more information (e.g. information regarding EU-Biocides-Regulation) see [www.fibalon.com](http://www.fibalon.com).

# FIBALON<sup>®</sup>compact

## High-Tech in mini format for Whirlpool, Jacuzzi and Spa

The innovative and patented  
polymer fiber filter

**FIBALON<sup>®</sup>compact**

consists of a combination  
of different polymer fibers  
with diverse surface structures and special fiber cross  
sections according to latest scientific findings.

The deliberately chosen spherical shape creates the  
largest possible filter surface and the optimized fiber  
combination guarantees a selectivity of 8 microns.

**FIBALON<sup>®</sup>compact** is the latest innovation from **FIBALON<sup>®</sup>**.  
The optimal **packagesize and -shape** facilitate the  
**handling**.

## The advantages manifold & compact

### Filtration performance

- » High dirt capacity
- » 3D filter effect
- » **High selectivity of 8 microns**
- » **Certified fibers according to ÖKO-TEX<sup>®</sup>-Standard 100**
- » Against biofilm formation

### Handling

- » Applicable for almost all whirlpools and  
cartridge filter systems
- » Easy to clean
- » Universal applicability and Maintenance free
- » **Re-usable**

### Sustainability

- » **Cost saving**
- » Easy disposal
- » **More durable than conventional cartridge filters**

## The Secret of FIBALON<sup>®</sup>compact

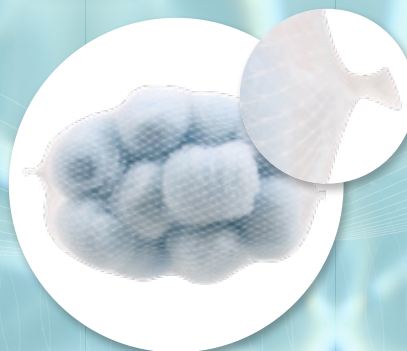

The deliberately chosen spherical shape maximizes  
the filter media surface area. The interior of the fibours  
ball consists of a slightly denser core and a softer wrap.  
The balls nestle together from a consistent filter bed.

**FIBALON<sup>®</sup>compact** is applicable for whirlpool, jacuzzi,  
spa and many commercial models (e.g., wading pools,  
garden pools). We developed also the fiber fixation  
**DyFix<sup>®</sup>** which yields an unusually high particle retention  
rate and deep penetration of particles into the filter  
media bed to provide excellent filtration results.

**FIBALON<sup>®</sup>compact** offers an optimal combination of  
fibers, can easily be washed out and is reusable. This  
**protects the environment and saves your money.**

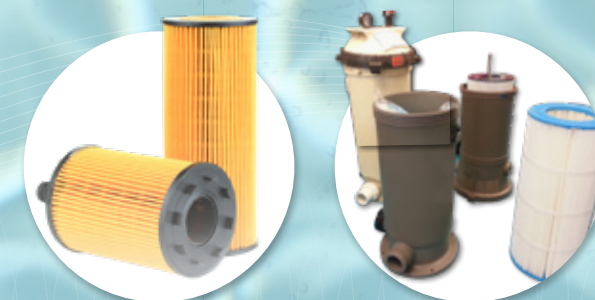

**FIBALON<sup>®</sup>compact**  
is an adequate  
replacement  
for cartridge filter

## FIBALON<sup>®</sup>compact v 1.400

replaces a 4 inch cartridge filter

## Conventional cartridge filter

A free combination of  
**FIBALON<sup>®</sup>compact V 1.400**  
for various cartridge sizes is possible
